Irrigation Notice.

Holders of water privileges, or those paying water rates are hereby notified that the hours for irrigation purposes are from 6 to 8 o'clock A. M. and 4 to 6 o'clock P. M.

ANDREW BROWN,

Superintendent Honolulu Water Works.

Approved:

J. A. KING,
Minister of the Interior.

Honolulu, July 16, 1896. 350-1m

The Evening Bulletin.

DANIEL LOGAN, Editor.

SATURDAY, JULY 18, 1896.

HOW WAS IT?

In the wrangle between the Advertiser and the Star over Captain Good's case, the Star to knock down the antagonist gave a somewhat specific statement of the character of some of the specifications attached to the charges. The authorities had refused to divulge the text or the nature of the documents to the newspaper fraternity, and it looked odd to see the Star's statement as if written by one who had been shown the papers. If the Star got the information through leaky officials having to do with the trial, it cannot be blamed for making use of it to sate the public's thirst for news. But if our contemporary gained its advantage through its well-known relationship to the field staff of the army, the publication was an unfair one as regards the other newspapers and a breach of confidence toward the military authorities. An explanation would be in order, in justice to all concerned.

According to "Gath," Mr. Bryan, the Democratic nominee, "is a clear, temperate, respectable person, a representative of the immature-minded Northwest. Again he is spoken of as a child who had jumped upon the rostrum and, by his spasmodic effort, had taken away the brains of the descendants of Jefferson and Madison. When all is said, however, Bryan was not nominated by an elaborate and costly machine, constructed months in advance, as the case was of McKinley.

Next year Professor H. Berger will have completed a quarter of a century as bandmaster for the Government of Hawaii. On the twentieth anniversary of the veteran bandmaster's incumbency he was treated with a rousing complimentary concert in the Opera House. It will soon be time for his friends to prepare an event for recognizing Professor Berger's silver anniversary.

There is no more Democratic party that Cleveland led. Its successor, or maybe only rival, inherits the tariff for revenue policy, and that is all.

Without a free silver Congress, a free silver President would be only a chip in the porridge.

There seems to be some blight affecting the bloom of the beautiful Poinciana Regia this season, for of all the trees in the city but few have blossoms enough to attract attention. The one on Hotel street next to the Arlington is a notable exception, and in consequence is a source of wonder and delight to visitors who have never before seen this tree in bloom. King Bros. have made several excellent sketches in oil and water colors of this subject, which are meeting with ready sale.

ponding with desultory firing. For half an hour there was great excitement. The insurgents finally retreated, carrying their wounded with them. The attacking parties displayed poor marksmanship, as they neither killed nor wounded any member of the garrisons in the outposts defending the city. From Pinar del Rio, General Bernal officially reports having sustained for two and one-half hours a combat with various insurgent bands intrenched in strong positions. In view of their tenacious resistance against repeated Spanish charges, Bernal personally led the last and successful charge, the artillery co-operating with good effect.

The rebel camps at Basney and Blanco were taken by storm and a great quantity of munitions captured. Bernal had only 600 men. He calculated that the insurgents numbered upward of 1600 and were commanded by Ramon Lazo. It is reported that the latter was seriously wounded in the fight. The Spanish loss is given at eleven. The rebels, in their flight, left thirty-one dead on the field. Peasant families in the vicinity say they carried away many wounded.

BOOKED TO LEAVE.

List of People Who Will Take the Australia on Tuesday.

The following passengers are booked to leave on the Australia:

E. L. Roeder, Brothers Joseph, Albert and Edward, Mrs. L. Kessler, Fred Horner and wife, A. L. Taylor, Mrs. Shortridge, Miss Marie Swingley, Mrs. M. S. Dumas, Mrs. J. C. REFRIGERATING MACHINES AND CREAM SEPARATORS.

Now that the Fourth of July celebration is over and people are settling down to business again, we desire to call the attention of the residents of the Hawaiian Islands to a few matters of interest.

We have lately been appointed sole agents for BARBER'S REFRIGERATING MACHINES.

This machine can readily be arranged in creameries, etc., so as to cool cream, milk and water to any desired temperature down to and below freezing, as also to hold a well-insulated butter-room at any temperature desired above 30 degrees, only requiring the running of the machine from four to six hours per day, which is the usual time that the other machinery in a creamery is operated.

In addition to creameries, these machines are also adapted for use in produce houses, meat markets, hotels, club houses, etc. Their perfect work has been demonstrated fully in the past two years in a large number of creameries in different portions of the East, and more particularly in the Elgin, Ill., district, as well as in butter houses in Chicago, New Orleans, and elsewhere.

The cost of operation is nominal, as the charge of ammonia furnished with the plant should last a year or more without recharging, and will cost only about \$15.00.

The DE LAVAL CREAM SEPARATORS are now in almost universal creamery or factory use the world over, and in the past few years the Dairy or "Baby" sizes of these machines have almost as completely revolutionized general dairying as had the larger machines previously the creamery industry.

The De Laval Company now presents to the public a smaller type of its latest and most improved "Alpha" machines intended for household and small dairy use, and designed to confer in its new field the same inestimable benefits of centrifugal separation of cream from milk as have the larger machines in their respective spheres.

No more fitting and descriptive term could well be applied to this little machine than the name which has been so aptly given it,—"Humming-Bird." It is very small, very compact, extremely simple, easily understood and cared for, safe and durable. It possesses every advantage to be found in any of the larger "Alpha" machines, is so extremely easy of operation by reason of its new method of obtaining motion as to be designed mainly for use by women and children, and is absolutely thorough in its effectiveness. It need simply be said that it fulfills every requirement of its purpose.

DECEPTION.

A man who had something to sell and who by honest representation lost the sale, would, according to the deplorable standard of today, lack an essential in the make-up of a salesman.

There is but one sure way to guard against misrepresentation in business: it is to supply an article of such merit that its superior qualities leave nothing to be desired. The truth more adequately describes such an article than a lie could possibly do.

To put inferior goods into the hands of a salesman whose living is contingent on their sale, is to lead that man into temptation. There is but one way to stop the sale of liquor and inferior merchandise, and that is to abolish their manufacture.

W. W. DIMOND'S

Put a ring around the word—opportunity—the occasion makes it. Never in the history of mercantile transactions in Honolulu have the people had such a golden opportunity to select a lamp as to-day. A manufacturer who had more than he knew what to do with, more than he had space to put them, wrote us of his troubles. We had none of our own so we listened to him. Our stock of lamps is the result of his tale of woe and you get the benefit.

A black lamp that will give a bright light is not a fad, but a style that will remain until "New Hawaii" shall become old. Being sombre in color they furnish with any decorations you may have in your room and any color shade that suits your fancy will look well on the lamp.

For a dinner table nothing furnishes the table better than black banquet lamps. We have them, not cumbersome, but of a height that will beautify rather than detract from the other features. We have piano lamps, hall lamps, boudoir lamps and every other character of lamp that ever was made. The prices are so low that it would injure our business to put them in this column.
